Projects

UI/UX Design | B Trip – AI Travel Planning App [↗](#) 11/2025 – 02/2026

- Conducted user research by interviewing 5 potential users to understand budget travel pain points and created user personas based on the findings.
- Mapped out user flows and information architecture to plan the app's structure across key features — trip planning, booking, and AI budget suggestions.
- Designed low-fidelity wireframes and high-fidelity UI screens in Figma using Auto Layout and reusable components for consistency across the app.
- Developed the booking experience for train and bus reservations, focusing on a simple and clear user interface.
- Designed the AI-powered budget recommendation feature UI, ensuring the information was easy to understand and act on.
